

# Setting Up Your Own Photo Blog

[DOWNLOAD HERE](#)

learn to create your own photo blog using free software. not only is photo blogging fun, it is profitable too. see how you can easily set up your own photo blog on your own domain, make it attractive to both people and search engines and profit from it too. From The Desk Of: xxxxxxx Dear Reader: Time to put a little fun into your day. After all - all work and no play.... however that goes. Having said that there is no reason why you can't have some fun and make a little cash while doing it. Heck lots of people make money just from posting on their personal blogs about things that happen in their lives. They do this by adding some monetization to their personal blog. Any money they make is a nice bonus but it is not particularly the purpose behind their blogging. Today we are going to talk a little about photo blogging. If you are anything like me you have hundreds or maybe even thousands of pictures on your computer, camera, phone or in albums. The problem is that they are all over the place, they are hard to find, and they are difficult to share with your friends and family if they are sitting on your camera or in an album somewhere. Now there is a better way. You can create a special blog which is geared specifically towards photo blogging. You can now quickly and easily put your photos up for the world to see (or just those you want to share with). You can organize them into categories to make them easy to find. It is the best way to share with others. It will also help you to organize your own photos. Creating your personal photo blog is all well and good, but there is something else you can do that can make you a lot of money. If have a particular interest (who doesn't) you could create a niche photo blog. For instance let's say you are interested in bird watching. You could create a niche blog on that topic and post pictures on it of the birds you photograph. You can then monetize the blog accordingly. Since you are posting content to this blog the search engines will pick it up and you will get targeted traffic. You can earn cash just for doing something you love doing. Best of all - the software is free. You have full control over your content since you put the blog on your own domain (www address). This is all explained in the videos. The cost is peanuts for a domain and hosting. Now you could use a free service but then you lose control of your own content. Your blog could be deleted at any time by a third party. Not so when you have your own hosting account. You can usually get a domain name for under \$2.00 (domain) and hosting for under \$5 per month, so the

cost is not an issue. Have a look at the photo blog I created in this video series. Here is just some of what you will learn: How to get a domain name and hosting. How to easily install the software How to make your blog rank high in the search engines How to categorize your pictures How to monetize your blog and so much more... This video series is going to show you everything you need to know about setting up your own photo blog. Don't wait - grab your copy now! Pick one of the packages below.
