

Set Up Your Own Online Gaming Site Plus Page Peel Ads

[DOWNLOAD HERE](#)

Time For a fun and easy way to make money. setting up your own flash gaming site is fast, easy and free. brand new video series takes you through the process step by step. I know you work hard to make money online. After all that is a requirement. It is tough to make money online without making a consistent effort and following a proven methodology. Having said that, "all work and no play makes Johnny a dull boy" as the saying goes. There is no reason you can't do something that is fun yet can make you money at the same time. And that is what we are going to talk about now. A great way to earn some extra money is to set up a flash game site that is semi-automated. It also has a revenue share component so that you have built in monetization. Once your site is set up you just click two links, and the games are automatically fed to your site and posted. That is all you have to do. Did I mention that it is free? Oh yeah, it is free. I searched hi and low to put the best free resources together so you could set up your gaming site for absolutely no cost. The components came from different places and I gathered them up so you can create a free gaming site with huge potential. You do not need any special skills to set up your own gaming site. Just follow the easy video instructions. Your only expense is a domain name (about \$9.00 per year) and web hosting (about \$8.00 per month). Other than that there is no cost involved to build your site. You can set one up just like that just by following the simple instructions in my video series. It is easier than you might think. Here is just some of what you will learn: * How to install the gaming platform. * How to search engine optimize your site. * How to monetize your site. * How to feed games to your site by clicking two links. and much more..... If you have been waiting for the right script to come along and clear instructions on how to get your own gaming site set up using a simple yet powerful script, then you have arrived here right on time. This is tailor made for you! Bonus Page Peel Ads If you ask me, peel ads are much less intrusive to your customers than "pop-up" boxes. Yes, I know pop-up boxes work, but I simply don't like them. You have NEVER seen a pop-up box on a Michelle Brouse site, and you probably never will. The things bother the heck out of me. Especially the pop-ups that have no clear way to close the box. Particularly irritating is when they pop up just as I got started reading on a webpage. Couple that with the inability to CLOSE the dang box, and I'm likely to get irritated enough to

just click right off the site. It doesn't matter how much I'm interested, put a pop up box right in my face that I have no way of closing, and you just lost a customer. Peel Away Ads are very cool in my opinion. I like that there is just a little movement up at the top of the page. (Or even all four corners if you prefer, but I'm not up to that point yet.) There is JUST enough "movement" to interest someone, but it's not right in your face like a pop up box. Humans are a bit curious by nature, so it causes enough interest to get someone to move their cursor up that way by their OWN choice. I'm not forcing them to look at that ad. They can either click, or skip it. All Peel Graphics include .PSD Layered Photoshop File
