

Dusty Eclectic Goldmine Vol.1 (rex2)

[DOWNLOAD HERE](#)

Dusty Eclectic Goldmine is a collection of sounds consisting mainly of breakbeat loops. The focus is on dirty, lofi sounds that would fit well into a mix of Boards of Canada or Aphex Twin tracks. The collection also include a dialogues folder full of sound clips from vintage advertising & educational movies. Those public domain cuts have been selected to be usefull for anyone seeking worthwhile sound bites to put in their mix. They have been sampled with Ninja Tune records & early 1990 IDM in mind. The rest of the collection consist of inspiring music loops as well as FXs, one shots & vinyl crackles. While designing the sounds, I had in mind to put up a sound library similar to the good old e-Lab X-Static Goldmine libraries. Dont hesitate to chop, remix & re-arrange the loops & sounds to your taste. It is by no mean a string the dots construction kit type of library. It is meant to be sampled & chop in a creative way. I hope youll enjoy this collection. Librarys content: (69) Breakbeats (39) Dialogues (19) Field Recordings (05) FX Loops (29) Music Loops (22) One Shots (17) Vinyl Crackles Total: 200 samples Available format for this version: REX2 Bit depth: 16 bits 44100 Hz
