No more than three producers (Dr. Dre, RZA, and Prince Paul) can test DJ Premier's status as the most important trackmaster of the '90s, and no style is more distinctive. Aggressive and raw, a DJ Premier track was an instantly recognizable mixture of battling loops and heavy scratching, all of them perfectly timed! DJ Premier is known for using the Akai MPC60 over and over throughout the years, probably since it first came out. A true vinyl sampling master, he always chooses the most rugged samples and always makes them swing. Bass Drums sampled even with the HiHat layered on top, raw Snares from old soul and funk records and crisp-dirty HiHats running on each pattern. Isn't that what you're looking for? The Hip Hop Workshop is proud to present: "DJ Premier Drums" Drum samples that match the beat production style of DJ Premier!!! This drum compilation is made by a beatmaker/producer for other beatmakers!!! There are toy beatmakers out there that say they have 10,000 and 10,000 snares... In reality, established producers only use about 10 to 50 BDs, 10-50 SNs and so on... and they just recycle them and change their library maybe every other season or on every other project they be working on. I've seen this in studios... Beatmakers using only 10 BDs and 13 SNs and maybe 10HHs for a whole album... They just EQ them and compress them differently on each track... If you are experienced with equalization and compressing, then you know that from a single drum hit you can produce maybe up to 10 different and "worth keeping" variations of that sound only by EQing and compressing it. So, if you're into the NYC beatmaking style, this collection will last you for many many projects/records. Copy-Paste into another folder the drums you like and use most. Make other smaller drum kits out of these drums. By customizing this drum collection you will get familiar with the big amount of drums we present. We advise you to use the same kits you've created over

and over for a period of time. This way you will get familiar with the enormous number of drums and you will have your own signature on the beats you make. Cos thats the key! Use the same sounds through a period of time and your style will be noticed in your hood, your city or the network youre about to build!!! Import them on your MV8000/MV8800, Phantom, MPC1000, MPC2500, MPC4000, HALion (VSTi) or any other hardware or software sampler and you have crystal clear drums along with the thickness and crispiness of these drums!!!
