About the Meditation 58 Mins: HEALINGWAVES Mp3 Brainwave Entrainment Session, Meditations 1

Simply put; this is the meditative sound of heavy rain with theta waves playing in the background. Theta waves are Binaural Beat Technology which can induce certain states of mind by playing different frequencies - through each ear of a headphone - to create a frequency we wouldn't normally be able to hear. These usually inaudible frequencies are the ones that can help promote states such as deep relaxation, clarity of mind and enhanced memory and focus - Theta waves are especially recommended for this. Natural Sounds such as rain are now highly regarded by alternative healing practices. Trials are proving that the sounds of nature - that we are often deprived of - can relax and calm us. Can enable us to rest and refresh our minds! Has even been prescribed to heal depression and anxiety and a effective aid for Insomnia. You can listen while you work on your computer, to block out annoying sound, to deeply relax, to meditate. To relieve tinnitus, insomnia etc. Our Guarantee When using the sessions all we ask of you is to give them a fair chance to work. Resistance, both mentally and physically, can block you from entering altered brainwave states. It may take a little time to get used to the sessions and relax into them. Regular practice ensures better results! If, however, you are not satisfied to the extent that you do not feel our sessions are what we say they are, we will give you a no fuss refund - can't say better than that! How To Use The Sessions The use of Headphones will provide a more personal and intense effect AND avoid affecting those around you. You will need to find a comfortable place to be, where you are least likely to be disturbed. If the environment is a little chilly, we suggest you have a blanket over you as your body temperature may drop. A glass of water may be needed at the end of the session. When you begin to listen to the session your mind will probably start to wander over to everyday things in your life but try to keep returning your focus to the sounds in your head; this is normal and is the learned art of any type of meditation or hypnosis. After about six minutes of undisturbed listening your brain should begin to entrain toward the given frequencies. You may have strong visual reactions or strange feelings of altered consciousness. Try not to panic and bring yourself out of the states, allow any images to come into your mind - go with the flow, practice makes perfect! It's useful to keep a diary for you to jot down your

experiences after each session for later reflection. Power meditations are a series of Brainwave Stimulation sessions designed to enable deep, hypnotic meditations and self help sessions! We sell no fuss, professionally backed audio meditations and brainwave entrainment's in mp3 download format to use with headphones.
