Discover How To Save \$97.00 Or More Every Time You Need Graphics Created! Most people are completely unaware of how easy it is to edit ready made templates. Sure graphics can be hard to do ... But once you have a starting point like a ready made graphic template ... The work gets much easier and it saves you a lot of time. Yet nearly every Graphics Artist works with templates just like this. Then they edit it with the words and colors of your choice and charge you \$97.00 or more to do it... Save yourself \$97.00 or more and edit these templates yourself in just minutes. Now that you have a Header for your site, youre going to need an eCover. With most header packages, trying to get a matching eCover for your header is nearly impossible ... Until now! I feel your pain ... I was there at one time too ... I bought some headers thinking I could edit them and then when I was ready to make my eCover ... I could not do it. I was out-of-luck. So I want you to have an EZ solution to create the eCover that matches your header. You need to build your cover so Im including EZ edit flat cover templates in the bonus section below. Not many headers packages have this and it is very necessary in creating a matching eCover. What is a flat image? How do I build the eCover? I get these questions all the time. The fast and easy way to build the eCover is with some kind of software. The best you can get is an action script used with Photoshop just as I used for the cover on this page. What is a flat image and what is it used for? All eCovers start out as a flat image like below. You then add your text to it and photos/images. You import that flat image into your eCover software then the software turns it into a 3D cover. I turned the flat image into a software box above. Dont buy any header package unless it has matching flat images so you can create your eCover. Without matching flat images you will have difficulty trying to match the eCover with your header. Just edit the flat image file, import it into your eCover software (sold separately) and out pops a matching cover for your use. Its simple to add your own words ... Just backspace over the pre-written words and replace them with your own words. Import the flat image into your eCover software and out pops the eCover. It is that simple now that you have a flat image to match your header. Flat images are included in the Bonus section ... you get one flat image to match each header. Check out the other bonus item backgrounds and order buttons and dont forget the image capture software program to capture any image you want. Get

this Template Package Today & Get These Bonus Items Free Bonus #1 - Matching Flat Images To Create Your eCovers Want your own Templates for Your eCovers? Well Im going to give you Matching Flat .psd files so you can create a cover that matches your header. This is made to match the header to a tee. All you need to do is edit it like you did the header then pop it into any eCover software of your choice. Free Bonus #2 - Graphics Screen Capture Software Now that you have a great Graphics, you Can Use A Screen Capture Software. Graphics Screen Capture Software - This is the best I found and use it on all my projects. Bonus tool that I use every day so will you! Free Bonus #3 - Order Buttons And Backgrounds You need to have a order button so you can take orders for your projects, I created some universal order buttons good for any website you might use. All in .psd files so you can easily edit them. Background Images - Want to add background color to your web site? Just edit your name or product name in the easy to edit .psd background file, save the new background image. You have absolutely nothing to lose and everything to gain. You would spend at least \$97.00 on just one set of graphics that you cant even edit because they are locked by the artist. These are all unlocked and ready for you to edit in any graphics program that can open .psd files. Youre getting 10 sets of graphics, worth almost \$1000.00, all for just the price of one set. This is a no-brainer money-saving graphics package that will have your site looking like you paid 10 times that much.
