

# Ambient Metal Constructions(acid/wav/apple Loops)

[DOWNLOAD HERE](#)

AMBIENT METAL CONSTRUCTIONS from Producer Loops blends the beautiful sounds found in ambient music with raging distorted metal guitars. This extraordinary 900MB collection was created by Chimp Spanner and it features 5 huge construction kits guaranteed to blow your mind! AMBIENT METAL CONSTRUCTIONS combines the sounds of ultra low tuned modern metal with sweeping cinematic ambience. It was created by 'Chimp Spanner', an instrumental progressive rock project created by UK based multi instrumentalist and composer, Paul Ortiz. When you download this Sample Pack you will find totally fresh and original content that is unavailable elsewhere. The pack includes 24-bit Loops in ACIDized Wav and Apple Loops formats. With influences from Dream Theatre, Toto, Brian Eno & Vangelis, the resulting sound is both new and familiar; challenging yet accessible. AMBIENT METAL CONSTRUCTIONS offers a "sound" that the Sampling Industry has never offered before and it's suitable for rock artists looking for some extra grit, as well as ambient and soundtrack composers looking for an alternative edge. No matter what style of music you write, you must hear the demo and experience this sound for yourself. If you can use this sound in your compositions, then we strongly recommend you do, as it could just be the "edge" required to uplift and enhance your productions. LOOPS INCLUDE: - Drum Loops - Synth Loops - Pad Loops / Washes - Bass Guitar Loops - Lead Guitar Loops - Rhythm Guitar Loops SPECIFICATIONS: - 900 MB Total Data - ACIDized Wave Files - Apple Loops/AIFF Files - Loops sync to BPM - 44.1 kHz / 24-Bit - PC/Mac Compatible - Royalty-Free (No Exceptions)
