This is a step by step video course that takes you by the hand to show you how to explode your conversions with Facebook Ads! Market Share Fact: According to a recent study released in 2010 by Experian Hitwise US, based on USA usage; Of the Market Share Google owns 7.03, while Facebook owns 7.07. On the graph it shows Facebook increasing, as Google takes a steady path. This means as advertisers, you have a large reach for potential clients. Problems Business Owners like you face: Its obvious that many business owners like you dont have a ton of time to market, but it is a necessity in order to survive your competition. If that is the case, then I recommend Facebook Ads. Problem with Adwords: Let me tell you a real story. Ive had success with Adwords and have used them for many many years. Until one day I was sent a warning by Google Adwords. It was my final warning before they were going to delete my account. Of course, it was my first warning as well. In fact many marketers alike that I know, who were legit as well, received that same notice. For the past few years, I have been complying with Google's rules and regulations; not selling anything illegal and doing everything ethically. However, because of a few bad apples, I was generalized as one, and theres a high chance you are too. The problem is, that Adwords is always changing, so it creates frustrations and roadblocks for a business owner, that doesnt have the time to keep up with the changes. Fortunately for business owners online and offline, Facebook is extremely easy to use compared with Google Adwords complicated system. Not to mention that it is super, super targeted. Its like the advertisers dream. Now thats not to say that Adwords doesnt work, because it does. But as times are changing, we realize here, that Facebook is indeed, where a ton of potential clients are. You can setup a campaign in a matter of minutes; get it approved, and start receiving extremely targeted traffic. Here are a few more reasons why Facebook Ads are the way to go. According to Facebook itself: * There are 500 million potential customers on Facebook * You can target your potential customers by location, age and interests * You can use simple image and text-based ads * You can build your relationships on a deeper level, by promoting your Facebook Page or website *

Facebook has a Like button to increase your ads influence * You can build a community around your internet business * You can control your budget by setting the daily budget you are comfortable with * You can choose to pay between (CPC) or (CPM) As you've seen from above, you have access to a massive market of extremely targeted, potential clients. Now keep in mind that just like any system, there are a few steps you need to follow, to get the success you need and deserve. You cant just setup a campaign and presume that it will convert. Yes these can be roadblocks, but there's a solution...DING! Introducing...
