

Diy Kreg Pocket Hole Jig Base!

[DOWNLOAD HERE](#)

Make A Portable Base To Turn Kreg R3 Jig Into A Big K3 K4 Master System! For less than \$13 worth of parts you can make your little blue R3 Jr jig work like the BIG K3 K4 Master Sytems including CLAMPING, VACCUM DUST COLLECTION & MATERIAL THICKNESS ADJUSTMENT! Kreg Tool Company does not like me for showing you how to save \$100 off their pocket hole jigs and they even threatened to sue me for mentioning the Kreg name in my earlier video. I changed my video and removed their name, now you can use that extra \$100 to buy something you need...like a new drill! :)
