Simply put; this is the meditative sound of heavy rain with theta waves playing in the background. Theta waves are part of the new Binaural Beat Technology which claims to induce certain states of mind by playing different frequencies - through each ear of a headphone - to create a frequency we wouldn't normally be able to hear. These usually inaudible frequencies are the ones that can help promote states such as deep relaxation, clarity of mind and enhanced memory and focus - Theta waves are especially recommended for this. Natural Sounds such as rain are now highly regarded by alternative healing practices. Trials are proving that the sounds of nature - that we are often deprived of - can relax and calm us. Can enable us to rest and refresh our minds! Has even been prescribed to heal depression and anxiety and a effective aid for Insomnia. Not to be used Whilst Driving! You can listen while you work on your computer During Meditation, illness, relaxation, shut out annoying sounds, tinnitus, bedtime etc. TO FIND OUT MORE ABOUT NATURE SOUNDS AND BINAURAL BEATS VISIT MY 'ABOUT ME' PAGE!

260090215877 ' NO MORE CD'S! Compact Discs are made from a 1.2 mm thick disc of polycarbonate plastic, then coated with a thin layer of Super Purity Aluminum. It has been reported that Polycarbonate (PC) used for products like CDs and refillable milk bottles, is usually made with the highly toxic phosgene -derived from chlorine gas. PC does not need additives but does need solvents for its production, such as methylene chloride, a carcinogen. Other solvents used may include chloroform, 1,2-dichloroethylene, tetrachloroethane and chlorobenzene. According to GREENPEACE polycarbonate plastic is the second

most hazardous plastic to make on the planet! archive.greenpeace.org/toxics/pvcdatabase/bad.html And that's not to mention the chemicals and plastic often used for CD cases and packaging, and fuel emissions from shipping and postage! It is estimated in America that 30 million CD's are tossed into the rubbish every month - each CD takes 450 YEARS TO BREAK DOWN!!! Billions of CD's are constantly manufactured worldwide every year as the demand for music continues and the population grows. The need to use a more environmentally friendly way of listening to our music is now vital. MP3's, Ipods and our computers are the least destructive of the moment and should be used!
