Fun and funky: the whole family will love it 16 MP3 Songs KIDS/FAMILY: General Children's Music, KIDS/FAMILY: Kid Friendly Details: Boogie Mites are a British group that has been working in the field of music education for young children for the past 9 years. Founded by singer/songwriters Harriet Thomas and Sharon Drain, Boogie Mites has produced three CDs of original childrens songs, which are catchy, educational and loved by parents as much as by children. The CDs are great for use in the home and car as well as in schools and nurseries. The songs are designed to encourage an active and involved response from the listeners so dont be surprised if you see your kids dancing (To Wake Up Now, Chocolate Cake) or hear them roaring, (along with the dinosaurs in Dyathinkhesaurus, Chocolate Cake). Here are some nice things that have been said about our songs. Thank you for the pleasure your recordings have given my child and me, plus husband and granny and anyone else who hears your CDs being played in our home and car. I just want to say that I think your songs are really very clever, original, varied AND unlike much music for children CAN be listened to again and again As an ex-music teacher I really appreciate the solid grounding in rhythm and melody Boogie Mites provides but hidden in very catchy and enjoyable songs Hugo claps his hands when the Boogie Mites CD is on at home. When it is not he points to the CD player to request it again and again. We hope that you and your child will have lots of fun with your Boogie Mites CD too!
