

# Mp3 Bruno Misonne - Aviation Music

[DOWNLOAD HERE](#)

A composer who started a new musical concept: music and aviation sounds are mixed together for a unique result . 12 MP3 Songs ELECTRONIC: Trance, CLASSICAL: Film Music Details: Welcome to the world of Aviation Music created by Bruno Misonne who is a composer from Belgium. His concept is unique : He mixes plane sounds with his musical creations and the result is an amazing soundscape. A pilot made him a compliment which describes best his work : "I always think that planes can sing, but with your music they can sing even better" When he started his first productions of this very special genre, he composed dance or techno tracks, but now he's specializing in film music. The equipment used is of top quality: A powerful computer equiped with a E-MU 1212m soundcard runs FL Studio 6 which is rated among the best music software available. World famous artists such as Mike Oldfield are also using this same software. The richness of Bruno Misonne's tracks is due to the fact that he's using fatastic plugins : Sytrus FM synthesis, Steinberg Hypersonic I and II, EWQL Symphonic Orchestra, Steinberg Halion Symphonic Orchestra, Vocaloid Miriam, Zero G Wired and Morphology, ... Further fine tuning of his tracks is achieved with an external midi controller (Evolution UC-33E) a pair of Alesis Mk2 active speakers and Sennheiser HD25-1 monitor headphones. The final mastering of his "Aviation Music" Compilation CD has been performed by Dicarlo Productions. Today he has signed a contract with airutopiawho started to use his music in his aviation DVD releases. He has many plans for other musical projects and everything related to aviation will remain his favourite source of inspiration !
