Lush electronic grooves; trance-influenced downtempo with a dub and tribal twist 10 MP3 Songs
ELECTRONIC: Down Tempo, ELECTRONIC: Trance Details: Gift Culture transcends the cold sterility of stereotypical computer music, infusing songs with organic and melodic elements of trance and dub, along with tribal rhythms. Temple at Dawn is a timeless album and a true pleasure to experience, revealing both infectious grooves and warm emotion at every turn. The Gift Culture project is based on sounds, imagery, and art derived from DSP technology, analogue synthesis, and computer-based non-linear editing. As Gift Culture mastermind Michael Hale explains, In this day and age, it is possible to sculpt light and sound as if they were clay. Throw a midi-digitizer, sensors, and a video-sampler into the mix and suddenly, you have the power to create fully immersive audio/visual multimedia environments. Gift Culture is the result - his attempts to share his explorations in this multi-dimensional space; to evoke sonic textures from samplers, synthesizers, and DSP algorithms that can only come from those things; a journey to discover their "voices", so to speak, using such techniques as granular synthesis, spectral synthesis, FFT/IFFT based spectral morphing and interpolation, and whatever other exotic algorithms he can coax out of his myriad machines.
