

# Mp3 Stereocrash - Crypto City Orchestra

[DOWNLOAD HERE](#)

Lose yourself in an endless sea of analog guitar scapes. They will leave your mind light years from where it gets on. 7 MP3 Songs ELECTRONIC: Ambient, ROCK: Noise Details: Despite what your ears may tell you this record contains no keyboards, computer synths or loops of any kind. Guitars from the 1950's, tape delays from the 1970's and aging analog recorders are the tool chest for the creation of Crypto City Orchestra. As Stereocrash frontman and guitarist Charles Perkins explains: "I have long been a fan of ambient electronica and wanted to try my hand at some instrumental works. Some film producer friends of mine really enjoyed 'Open' and 'Seascraper' from my first record and encouraged me to develop a work based on those themes. I don't own any sequencing gear or synths so I started experimenting with ways to extend and layer guitar and noise tracks together. For low end sounds beyond the range of the signals a slowing of the tape was used instead of digital pitch shift. After a year or two of experimenting I was left with a huge pile of music and noise. Some months of carefully combing through it all yielded what I think is a pretty unique work. Crypto City Orchestra represents what I love in ambient music yet discarding some of the glassy sheen that I feel can distance such music from the listener." Crypto City Orchestra is a soothing yet emotional journey for the mind. Powerful and graceful if you enjoy ambient music this disk is likely to make a home in your cd or mp3 player. Stereocrash is currently working on a follow up to Crypto City Orchestra an actively searching for a film project to provide a score for.
