

Telephony/dial Tone/dtmf/hang Up Sfx Pack (sound Effect Wav)

[DOWNLOAD HERE](#)

This is a bumper SFX pack of telephone line sounds. It contains the following: 1. 9 seconds of BT dial tone 2. A random number being dialled 3. Ringing tone (earpiece on phone reciever perspective) - 7 rings 4. Other person putting phone down (earpiece on phone reciever perspective) 5. Hang up BT dial tone (earpiece on phone reciever perspective) 6. All DTMF tones (to create your own dial sounds) 7. 20 seconds of phone line hiss - to add authenticity to recreating a phone call. This can obviously be looped. Also see our other SFX of the classic SFX of 'the other end of the phone call' - search for 'talking on the phone'! All files on sale by Sevenleaf SFX have been recorded by professionals and are available for you to download as 16 bit 48kHz stereo wav files. Previews are low quality mp3 files with security watermark beeps. Purchased files are broadcast quality wavs without watermarking.
