

Create Your Own Websites Using All Free Tools Video Tutorial

[DOWNLOAD HERE](#)

Create Your Own Websites Using All Free Tools: Watch your earnings soar by creating a professional quality website. Now you can create your own money grabbing website with free software and templates. This Seven part video series shows you how. No one ever told you that making money on the Internet is easy. If they did they were lying to you. It is not easy and you need every advantage you can get. Having a compelling website is one of the key ingredients to being successful on the Internet. If your site looks amateurish you will definitely limit your earning potential.. Software that can help you create your website can cost hundreds of dollars and can be very difficult to learn to use. I have taken care of that obstacle for you. I will show you where to obtain a software package for no charge that will do everything those expensive packages do. The seven part eighty seven minute video series in this package takes you by the hand and shows you step by step how to use the software. No need to spend hours reading clunky manuals. The series even shows you how to use the self publishing feature that will upload your website to the Internet automatically. All you need to do is fill in some simple parameters on a form and click publish and your site will be automatically uploaded. Here is a summary of the video content: * Video One - Introduction * Video Two - Editing Your Pages * Video Three - Working With Tables * Video Four - CSS (Cascading Style Sheets) * Video Five - Site Design Using CSS * Video Six - Using Templates * Video Seven - Publishing to the Internet Dont worry if some of the terms are unfamiliar to you. By the time you get through the video series you will be an expert. The video series shows you how to create s squeeze page. (Optin Page). We use this page to show you all of the features you need to use to create your pages. Later in the series we show you how to work with free templates. This page you are reading right now was created using the software and the techniques shown in the video series. About The Software. No HTML knowledge is required. This is what is called a WYSIWYG editor. (What You See Is What You Get). It works much like a word processor. Although you can view the source and the tags created you do not have to concern yourself with them. If you can use a simple word processor like Word pad or Word you can use this software. The software in combination with the video series makes it simple for anyone

to create a great website. Save yourself some time and money and get your copy of the video series today. In less than two hours you can start creating a professional quality website and begin profiting from it. We show you where to get free website templates off of the Internet. We even show you how to embed video and AdSense code into your sites so you can begin profiting from them almost immediately.
