Therapeutic music used for relaxation and mood elevation. 14 MP3 Songs EASY LISTENING: Mood

Music Details: My name is Bruce Lloyd Kates, I am a classically trained musician, pianist and composer living in Los Angeles, my place of birth. Much of the music that I compose has been widely used in clinics and hospitals where people are undergoing the stresses of chemotherapy and dialysis. Medical professionals have reported that my music has a calming and mood-elevating effect upon patients. The album I am offering on this site is a one-hour compilation of gentle music I wrote for harmonica and piano. I was fortunate to obtain the services of one of the worlds foremost harmonica players, Tommy Morgan. It is my hope that this music will offer a healing balm to people in this troubled world of ours, and not only just to those suffering from life-threatening diseases.
