A melancholy ridden blend of electropop and britpop. 11 MP3 Songs ELECTRONIC: Synthpop, POP: British Pop Details: Ghostwheel is the artistic pseudonym of European-born, US-based producer / recording artist Dobo Radichkov. Ghostwheel sources musical inspiration from Depeche Modes world of dark electro-rock soundscapes and UKs Britpop scene. Ghostwheels music transcends reality to a place glorifying the beauty of melancholy ridden melodies driven by stark, yet layered atmospheres. Technological precision, ethereal instrumentation, experimental sampling, vulnerable vocals, and human imperfection catalyze a chemo-musical reaction best described as, well, ghostly. Newborn, Ghostwheel's impending first release, is a collection of ten atypical Depeche Mode covers. The album was recorded during 2006-2007 and is released on Minor Key Records.
