This album represents my entrance into the realm of electronic music. It contains various works from the years 2005-2007 and covers many grounds in the psychedelic world. Recommended for Full-On/Goa Trance lovers. 8 MP3 Songs ELECTRONIC: Psy-Trance, ELECTRONIC: Trance Details: Troy Anderson was born on December 28th, 1984, and resides in Oak View, California. In 2001, while still in high school, Troy would spend his spare time throwing together hip-hop beats on his computer, and eventually he began a project with his friend Kyle under the group name, Ill Duce. By 2005, they had put together a full album: Illectrifying. After releasing the album, Troy realized that hip-hop wasn't his true calling, and he began experimenting with various styles of electronic music. Shortly thereafter, he became close friends with Paavo Stubstad (Malachyte/Ignite), and they wrote an experimental Trance song together titled Toxic Bass for Paavo's second Ignite album, Nocturne. Realizing that his true passion was Psychedelic Trance, Troy began to familiarize himself with as many different artists and styles as he could. He became particularly inspired by the work of Astral Projection, and his inspiration grew to a higher level after attending an out-door PsyTribe event in southern California. People who are interested in Astral Projection Infected Mushroom should consider this download.
