Teddy Bear Band information Teddy Bear Bands family support perspective creates opportunities for parents to interact with their children with music that is adult friendly. Teddy Bear Bands child development perspective supports young children's natural interest in having hands on experiences. TBB music is a catalyst for their

participation. When a child experiences a Teddy Bear Band performance there is a sense of I did it, I was in the show, and I did it with all the other kids, enhancing socialization skills. BYOTB ! Teddy bears are invited to join the party as objects of interaction to help children with participation concepts and add to the fun. The Teddy Bear Band difference (Imagination and Education) Most childrens music has a primary purpose of entertaining by telling a story, singing along, or teaching. TBBs first commitment is to participation where the music is crafted so that any intended educational concept receives its primary support as children learn by doing. Educational support may also be provided by lyrical elements in the bands music.
