

Mp3 Gale Revilla - Pharaohs 2

[DOWNLOAD HERE](#)

Enter the Ancient Land of the, "Pharaohs". This is World/New Age Music that has some of the most intoxicating music you will ever hear. 2X Awards / 2X Nominations. 11 MP3 Songs NEW AGE: Environmental, WORLD: Middle East Details: New Age / World Music Never Sounded like this before.. Enter the Mysterious Land of Ancient Egypt.. Travel back in time to the days of the Pharaohs. Gale pulls no stops with this Fantastic Album.. She uses Water Canon Drums mixed with some of the most soothing flute playing and ancient Melodies you have ever heard.. One minute your hearing the Ancient Flutes and the next, your heart pounds to the massive drums and 180 piece orchestra that comes right out from the middle of the Sahara Desert. Totally Mesmerizing and Intoxicating! Gale is one of the most diversified Recording Artist in the world today. When one composes songs that send you back to places like, Ancient Egypt and grabbing 2 Awards and 2 Nominations in the process. Then, she goes and grabs another Award Nomination for a completely different genre' like, her Native American Album (two complete opposites in music styles and genre's) and you can start to see what we mean by her being so diversified and unique. So, now comes a very hard question to answer. Who does she sound like? We are really not sure how to answer that because, her 21 CD Albums crosses so many genre's and styles within their own genre's. We could start dropping names into a hat, (it would need to be a very big hat), like Yanni, Kitaro, Vangelis, Tangerine Dream, Carlos Nakai, Robert Mirabal and the list goes on and on who she sounds like on one album and how she sounds like someone else on another album. But with all of this said.. We can say that, she is unique and very rare when it comes to her Native American Language in songs and melodies. Gale is Mescalero Apache and the language is slowly vanishing. There are maybe two or three Recording Artists in the world today who sing in Apache' (not including the Apache' Pow-wows circles) on the reservation in Southern New Mexico. She is all alone when it comes to composing her native music to a contemporary style and not lose the spirit of her people. So, who does Apache Native Music like Gale? Who does Ancient Egyptian Music? Who has her music playing all over the USA at Renaissance fairs with her Renaissance Music? Who sends you to Ancient civilizations like, Antarctica, Atlantis or to Lemuria? Who takes you back to the Ancient Native Americans? How many Artists did you think of? A

few? A lot? None? Now you can see why we have a hard time saying who she sounds like. Maybe we should start re-phrasing this and ask... Who sounds like Gale? 16 years, 21 Albums, 2 Awards 3 Award Nominations says the music is at it's finest. Would you have it any other way?
