Dear Webmaster, You probably don't need me to tell you how much the multi-media industry has explosively grown over the last couple of years... and there's no sign of slowing down. Hundreds if not thousands of new web sites are created each and every single day .. business and individuals alike are searching for their piece of the e-commerce pie. In this day and age, You need something to stand out from the crowd. Something that will help you to attract a list of new, loyal and hungry buyers. Audio Streaming, Video Streaming, Podcasts, RSS Feeds, Blogging .. all of these concepts have taken off in the past few years and are the new "norm" online today. But there's one feature that is almost always present in each of these concepts and that's AUDIO. In fact, audio is now used on the regular both in product creation and in product promotion. Webmasters use audio to not only add exciting background music to their products but they also use audio to create stunning video productions for their sales pages. We already know that text alone is going down the tubes did you know that 51 of Google searchers last year searched for the term VIDEO? What's a video without AUDIO? A video production without audio is like a supermodel without make up. It just doesn't make sense and not to mention very boring. Webmasters use Audio to fill up their productions .. to make them more exciting.. and to catch their visitors attention. So here's the problem you've probably run in to... Finding the time to locate new audios to use, purchasing them for your own use, and dealing with their licenses and copyrights. Who has the time for that?
