Encore! Encore! After the great success of Prime Loops' breathtaking orchestral percussion sound library "Cinematic Impacts Vol. 1" we are now proud to present you the ultimate sequel: "Cinematic Impacts Vol. 2"! Surround yourself with the sound of another mega download of over 1GB atmospheric and suspense-filled royalty-free percussion loops, perfectly engineered for instant use in action sequences from any movie, or dramatic buildups in any dancefloor destroyer. With over 380 loops, arranged over a total of 25 kits at tempos from 80-145bpm, this is the perfect supplement to Prime Loops' critically acclaimed "Cinematic Impacts Vol. 1" collections. These bump-in-the-night building blocks contain layer upon layer of spine tingling taps, bangs, slaps and clicks spiralling up and up 'til you fall off the edge of your seat. Get your audience's blood pumping with deep timpanis and powerful toms, get their ears tingling with trembling triangles and cymbals, and add ethnic and traditional percussion into the mix to spark up the imagination of viewers and dancers alike. Our man behind the red curtain Jean Baptiste Lacaze has finally earned a long holiday after completing this opus of beautifully polished percussive phrases. You should also check out "Cinematic Impacts Vol. 1", and his other dramatic triumphs "Ambient Funk", "Planet Of The Orchestra" and "Orchestral Scores" for the ultimate prize-winning combination.
