THE FLYING BABY gained a lot of appreciation from the Israeli music industry and their following has been faithful and ever growing. Geva Alon is releasing his first solo album these days. the album, titled "Days of Hunger" is a different side of Geva. A more accustic side that wanders between the Blues, Folk and even Country styles. for years Geva has played hundreds of accustic gigs by himself in different bars and clubs around the country and beyond. it was always the most natural thing for him to do and now, for the first time, it's on cd. this collection of intimate, melodic and very personal songs that were writen in the past 2 years, shows an almost opposite side from the hard rockin', FLYING BABY. but after all, digging into the songs lyrics and atmoshire, you'll find the same person behind them all. Geva Alon was chosen for "artist of the year" (2006) by Tapuz.co.il (the largest Israeli music web site) and "Days of hunger" was chosen for one of the best 3 albums of the year.
