

Mp3 A.k.a.c.o.d. - Happiness

[DOWNLOAD HERE](#)

A sound that is sexy, psychedelic, and cinematic; drawing influences from Morphine's "Low Rock", and the dark story telling of Nick Cave, to Hendrix and Black Sabbath. 12 MP3 Songs ROCK: Modern Rock, ROCK: Psychedelic Show all album songs: Happiness Songs Details: A.K.A.C.O.D. has created a darkly psychedelic sound that is sensual, cinematic, and otherworldly. The band features Morphine/ Twinemen saxophonist Dana Colley, Bourbon Princess vocalist/bassist Monique Ortiz, and drummer Larry Dersch of Binary System/Concussion Ensemble. Ortiz met Colley in May of 1996 at the Trocadero in Philadelphia, when he was touring with Morphine. After a brief but fateful conversation with front man Mark Sandman, she decided to pack her bags and move to Morphine's home base of Cambridge, MA, in search of a better creative environment. Within a few months of moving to Cambridge she began performing solo, and within a year she formed Bourbon Princess. In 2003 Dana agreed to record, co-produce, and perform on the second Bourbon Princess LP Black Feather Wings. Monique and Dana knew Larry Dersch through the "Morphine circle" (he played on the Morphine LP Like Swimming) as well as his other projects, Binary System (a duo with Mission Of Burma's Roger Miller), and the Bad Art Ensemble. Last fall Monique and Dana began writing and recording material together and invited Larry Dersch to complete the line-up of what is Also Known As Colley, Ortiz, Dersch. They have been packing rooms and garnering rave reviews despite not having released material. Their debut c.d., which is due for release in January 2008, is now available exclusively through CD Baby at their live performances.
