About the Meditation 40 Mins: HEALINGWAVES Mp3 Brainwave Entrainment Better Relationships, Confidence & Security Session - These sessions are developed to help people achieve more confidence and security within themselves and build better relationships with others. This is a comprehensive session using amongst others, SMR and Beta Waves. Using high tech sound therapy, our sessions are designed using the latest methods of delivering effective MP3 brainwave entrainment to you. The sessions are based on increasing emotional stability and cognitive behavior. They can also help to relieve signs of depression, anxiety, autism, ADD and more! Love 1 - 40 minute session which includes the use of affirmations regarding self confidence, and emotional stability. These begin once the session reaches the stage of entrainment where your mind will more effectively absorb the affirmations - much like hypnosis

Our Guarantee When using the sessions all we ask of you is to give them a fair chance to work. Resistance, both mentally and physically, can block you from entering altered brainwave states. It may take a little time to get used to the sessions and relax into them. Regular practice ensures better results! If, however, you are not satisfied to the extent that you do not feel our sessions are what we say they are, we will give you a no fuss refund - can't say better than that!

How To Use The Sessions The use of Headphones will provide a more personal and intense effect AND avoid affecting those around you. You will need to find a comfortable place to be, where you are least likely to be disturbed. If the environment is a little chilly, we suggest you have a blanket over you as your body temperature may drop. A glass of water may be needed at the end of the session. When you begin to listen to the session your mind will probably start to wander over to everyday things in your life but try to keep returning your focus to the sounds in your head; this is normal and is the learned art of any type of meditation or hypnosis. After about six minutes of undisturbed listening your brain should begin to entrain toward the given frequencies. You may have strong visual reactions or strange feelings of altered consciousness. Try not to panic and bring yourself out of the states, allow any images to come into your mind - go with the flow, practice makes perfect! It's useful to keep a diary for you to jot down your experiences after each session

for later reflection. Power meditations are a series of Brainwave Stimulation sessions designed to enable deep, hypnotic meditations and self help sessions! We sell no fuss, professionally backed audio meditations and brainwave entrainment's in mp3 download format to use with headphones.
