Guitar driven and Vocal oriented music are wrapped around a collection of great songs and stellar performances. Hailing from Central New York, this is a band you will hear more and more about. Check out the video and clips for a glimpse into the world of TEN MAN PUSH. This band is getting geared up for a big push...TEN MAN PUSH! Lonnie Park - Lead Vocals, Guitar Gritty emotional songwriting and raw powerful vocals pour out of this front man for TEN MAN PUSH. "His melodies and lyrics draw you in and evoke raw emotions; you can't help but to feel that emotion and attach yourself right to it" (CNY Rock Review). Lonnie Park has nurtured his talents in the shadows of the music business as a performer, producer, writer, and studio engineer. Now TEN MAN PUSH is the platform where he demonstrates his passion and talent as the centerpiece for this new band. John West - Lead Guitar, Vocals It is no surprise that the lead guitar work on the album is melodic yet gut wrenching and addictive! If you know John and his body of musical work, it all makes sense. He is the master of melody, and that is as evident in his approach to the guitar as it has been for vocals. His performance on harmonies and his signature voice add a unique texture to the songs. As a live performer, John brings a fantastic energy to the stage. As co-producer of the album, he lifts the level of quality for each and every element of the band. Nate Horton - Drums Hes a consummate professional and a quiet gentleman, but when he gets behind the kit he is a monster. Hes a precision machine who can swing from the most tasteful nuances to a leveling flurrys of insane drum chops. No one works harder to bring the best to the stage each and

every time. He was Cortland NY's best kept secret, now it's no secret at all. Ten Man Push will make sure of that. Dave Hoyt - Bass, Vocals Bringing power and attitude to the band, Dave's presence in TMP is strong. His motto Go big or go home sets the tone and has been adopted by the band. Also a central NY native, Dave is a rare find, and a rare breed. He is not only an incredibly dedicated bass player, but also a motivated professional, and commanding as a performer. Prior to joining TMP, Dave had been actively digging in the scene trying to find the right mix. He found it and a home in Ten Man Push.
