

# Mp3 John Luttrell - The Corridors Of Time

[DOWNLOAD HERE](#)

Ambient Progressive Rock. 14 MP3 Songs ROCK: Progressive Rock, NEW AGE: Ambient Details: This release is kind of a rewind over the years, down "the corridors of time" to all those different "doors" in my life, some I opened and others I closed (or never opened). The music started as the score for a film called The Box that was written and directed by Steven Deeble. After creating the music for The Box, I continued developing several of the themes and the whole thing morphed into this release called The Corridors of Time. It represents various influences over the years, the places Ive lived, different musical styles, foreign cultures, etc. I was born in Venezuela. Angel Falls is one of the landmarks of Venezuela and the Amazon Rain Forest, so I thought it would be an appropriate place to start. People who are interested in Pink Floyd Genesis Vangelis should consider this download. Searches:john luttrell the corridors of time buy 8.99
