An extreme abuse of beat and melody - all the gritty, dirty electro-funk you could ever want. 9 MP3 Songs

ELECTRONIC: Breakbeat/Breaks, ELECTRONIC: Trip Hop Details: Suture's debut, Persona, is an extreme abuse of break-beat, bass and melody. Never slowing from the first track to the last, it is a trip through the techniques and funk laden grit that made the Chemical Brothers, Propellerheads and Prodigy world renowned. Also heavily influenced by Aphex Twin, Herbie Hancock (Headhunters), Squarepusher and Photek, Suture's Persona gracefully ties the line between the commercial and the innovative sides of funk and electro. (visit cdbaby.com/behavior for the alternate project from Suture frontman Michael A. McCann) AUGUST NEWS: Suture on MTV throughout the Spring and Early summer. Hear tracks on the James Bond "Die Another Day" documentary, Shakira, Avril Lavigne, DMX, Mariah Carey and Good Charlotte "Making the Video" docs. Also, check out Suture on the DVD release of Season 1 "Drop In" - the extreme Free-Ride Bike program. Licensed by MTV, Global, Alliance Atlantis, Kenwood Audio, Raw42, SportsNet and countless others, Suture has gained more and more in popularity each year. These tracks are heavy, progressive, and if you're into big-beat electronica (early big-beat/break-beat) with a much grittier edge, you will not be disappointed.
