Reggae, ska, alternative 8 MP3 Songs ROCK: Ska, WORLD: Reggae Details: Better Chemistry is group made up of friends from the LA area following the old classic "Calimacan Style" a mix of Cali rock and Jamaican style roots. Influenced by many great reggae artists, Sublime, The Grateful Dead, and so much more. Our music blends reggae, ska, rock, funk and soul. And our new disc is out, street date 11/2004. We put all we had behind this disc and it shows in the quality and sound. We know it took forever and a day but it is worth the wait. Thanks to Ted Pearlman for his work on Better Chemistry, track 1...he added some great acoustic guitar, clav tracks, and vocals as well as the final mixing and mastering. Also featured on the disc is our friend Tippa Irie, as you may have heard him on the Black Eyed Peas hit "Hey Mama." Some sweet background vocal work done by Leroy Osborne, from Sade, Rod Jackson, from Slash's Snakepit. Ian Souter- Trumpet, Danny Levin- Trombone and Kat Franklin, vocals. THANK YOU all for the support, now buy it!!!!
