This is an instructional CD on "Vocal Riffing", a vocal skill that is used by singers like, Brian McKnight, Mariah Carey, Whitney Houston and others. 18 MP3 Songs SPOKEN WORD: Instructional, SPOKEN WORD: Audiobook Details: Some singers (like Whitney Houston Brian McKnight) have the natural gift of riding the musical staff at any speed. We call this vocal riffing. Many people, though possessing the ability to sing, lack the ability to riff. Those who lack such a skill often try to do it during a performance, only making themselves look and sound unprofessional. One must admit that it is easier to mimic Pavarotti than to imitate Mariah Carey. Riffing is a major part of vocal training that most vocal coaches over-look. Some artists over-use riffing, making it the main focus of their song or displaying it like gaudy jewelry. The intention of this production is to help you enhance your vocal skills - to sweeten the song and to make it more interesting to the ear..... not to make you a show-off. This CD will give you the vocal training needed to develop or strengthen your vocal riffing skills
