Download Free Preview for more Detail! It Does Not Matter What Part Of The World You Live In... If There Are Local Businesses, This System Can Work For You! Dear Soon-To-Be Local Business Guru: I'm sure you've seen a lot of offers stating that you can build a successful business right from your home. There are many scams out there... What many of them do is sell you a "small slice" of the information required to get started, then you must order "the preimum" products to continue. This Is Not One Of Those Systems That Uses Modules! If you have basic internet skills and are willing to follow the steps outlined in "The Simple Business Recipe", you can get started within minutes of downloading this system. One of the best things about my simple business recipe video tutorial system is; you can become a very valuable asset to local business owners and they will certainly tell other business owners \$\$\$\$! Many of them will be begging you to throw them a device to keep them afloat. The fee you charge compared to newspapers and radio will be a \$life preserver\$ to many of them. You will be getting them customers they would have never had without your services... Here are some facts about my business recipe: * You can work as few or as many hours as you please * The only other thing you need is a low cost and quality hosting plan * The business is scalable - keep it small or build a company around it * Will work in even the smallest towns and cities worldwide * You MUST be able to follow instructions in the english language * You need to have basic computer and internet skills to start immediately * I have provided bonus training videos on advanced subjects Introducing "The Simple Business Recipe"... (image for illustration purposes only - this is a digital download product) As I mentioned above, many of the courses you see on TV or online only give you a very small portion of what you need to get started building a real business. Many start with assumptions that you already know how to do everything. Like how to actually build a website for a local business, or that you know how to get traffic to your clients website. It's no wonder that so many of these courses are never used, they just sit and collect dust... Let me point out once again that you will need basic web skills to perform the task of setting this system up. What I mean by basic is knowing how to register a domain name and point it to your web host and using a FTP program. These are simple tasks and can be learned in less than one hour. I have provided bonus videos on these

advanced subjects in case you do not know how. There Is A Fortune To Be Made Marketing For Your Local Businesses, But What You Don't Know Are The Key Ingredients That Many Others Are Leaving Out Of Their Courses - On Purpose! Why On Purpose? So They Can Sell You Other Modules! The Simple Business Recipe Does Not Leave Out Any Key Ingredients! * I show you what the first sentence out of your mouth should be to a local business owner should be (Talking about the first sentence after you make contact and introduce yourself. Every conversation with a local business owner must start off to your advantage if you're going to ensure your success!) * I show you an easy way to build a very simple website for a local business - in under one hour (Even if you only charge \$150 for a listing, that equates to \$150 per hour! It is easy to, if you can cut and paste you can build a professional looking website using the free program that I'll show you!) * I show you how to get your clients information listed correctly at the Google Local Business Center (This is a well guarded secret that many web builders do not even want you to know about! The Google Local Business Center used correctly is a invaluable traffic tool...) * I show you my secret method on getting traffic to your client's listing (This has nothing to do with search engines either. My traffic generation method will have your local business clients thanking you all the way to the your bank!) * I show you how to set your local business relationships up as a monthly residual income money machine (You do not have to settle for one time payments when creating listings for a local business! It is very simple to create a residual income that pays you month after month for years to come!) The Best Part About "The Simple Business Recipe" in my opinion is you can spend a few hours a week or make it a full time business. The choice is totally yours... This is truly a business you can start from your home with very little investment or experience. Once you get your first sale completed, I have to doubts that you will want to expand. It would be very simple to hire a sales person on commission and then contract the web building out. The sky is the limit! Once you get your business up and running, there is no reason why you cannot 'expand' into the next closest city. All you need to do is duplicate what you have already learned. Once you have setup your first simple business recipe, duplicating it is a breeze! You can do this over and over. By now you must be wondering exactly what is included in "The Simple Business Recipe" system... You will get the following with your digital download purchase: Video One: Introduction To The Business: This is not your normal "intro" video that just tells you what is included. You will learn the 'meat and potatoes' of The Simple Business Recipe system. Video Two: Building The Website - Part 1: You are taken step by step into setting the simple website platform up. Follow along in

this point and click method of installing the website on your hosting account. Video Three: Setting The Site Up - Part 2: You are shown in this video how to make the website unique with a design you have picked. Best part is you are provided with free template links in the resource guide -Zero Cost - Video Four: Setting The Site Up - Part 3: You have the website template installed from video 4. Now You need to customize it with yours and/or your customers business name and other related information... Video Five: Setting The Site Up - Part 4: In this video we continue to customize the settings. We get under the hood with these simple instructions and really start to tune the site to your preferences. Video Six: Setting The Site Up - Part 5: The last of the setting the site up series. We continue working under the hood and tweaking the website layout. These simple changes finalize your site personal preferences. Video Seven: Google Local Business Center Listing: Very important part... You and your customer need to be listed in the business directory so when people search they find the listing with a map, phone # and business hours. Video Eight: Best Web Traffic Source: In the old days you could build a site and people would come. This has changed with the amount of sites being added daily. You need 'targeted' visitors to the new website... Video Nine: How To Get A Monthly Recurring Income: This is where you learn how to get your new client to pay you a monthly recurring fee to host their new website. Pricing tips are also discussed. Video Ten: Simple Business Recipe Recap: We go back over the 9 subjects covered above. Also I inject you with more new ideas on making additional income from your new client. Resource Guide: The "Resource Guide" is a very important part of the overall business recipe. I have put all the links discussed in the videos above. I have also provided you to the same exact resources that I used to learn about search engine tips. You MUST get traffic to the websites! The more traffic you provide, the more you can charge for your services... Training Guide: This 30+ page training guide discusses the videos indepth, with extra illustrations to make sure you fully understand how to use the simple business recipe. Suggest that you print it out and keep it close by while watching the 10 videos covered above. Once printed out you can take notes on the pages. This will become great reference material for your first client setup and all future ones to come. **BONUS HOW TO VIDEOS INCLUDED!** I do not want you to miss taking advantage of this business recipe! If you have never worked with setting a domain up or used a FTP program, the below videos will walk you through these steps. How To Register A Domain Name This will assist those who do not have their own domain name. How To Change Domain DNS Settings Shows you how to point your domain to your webhost. How To Use A FTP Program This is how you will transfer

files to your webhost. How To Add A Paypal Payment Button If you do not want to deal with checks, collect payments online. How To Change A Customers Web Theme You will need to make each website have a unique layout. How To Research For Top Keywords Maybe advanced to start with but will come in handy! I want to be totally honest with you: If you do NOT have a web hosting provided already, you will need one and that can be had for less than \$10 per month. It goes without saying that a telephone is a must... If you do not have a telephone - you can't really be serious about any type of business!
