A Nigerian christian worship album featuring highly energetic praise medlies with very inspiring deep worship segments. A complete praise and worship experience. 12 MP3 Songs GOSPEL: Traditional Gospel, WORLD: African Details: Music should never be purely for entertainment. Music is too powerful to disrespect it in that way. I believe strongly that whatever gets recorded and shared with a larger audience than yourself must mean something to you first... Therefore, I use only ONE point to decide whether to let a project out or not and that is the answer to the question: "Does it touch me when i listen to it? Do i feel moved by it?" I explored this belief of experiential music in "Eledumare 2" a studio constructed album which is available on CDbaby as well. This Vol. 3 takes the belief and puts it live on stage... the value of the experience sky rockets when the live performance of music is experienced... Vol. 3 has such power. Volume 4 is currently being produced. I also work with individual artists to provide similar experiences for people and one of such is my latest collaboration "Expression" with a lovely, unique vocalist "Tutu Babalola". The album is also available here.
