

Maya Modeling I Chapters 13-15

Want to learn the various polygon modeling techniques in Maya? Want those skills to translate to other programs and other versions of Maya? The polygon tools in Maya have not changed that much over 2008-2011 so this series will be good for quite some time. I am using maya 2011 in this series. I designed this series for my Modeling I college class as a supplement way of learning Polygon Modeling. Once you have the techniques down the skills will last you a lifetime. This series is broken down into lessons with assignments in case your a student trying to learn this away from a college or an instructor. The videos play both on a Mac or PC and also on I pads. The great thing about having the video file is that it plays and rewinds without the need of the Internet and Youtube. This makes the learning process a lot smoother. Lesson Files for this series is located here for free mediafire.com/?fqc18bz6qpz5glq Or can be purchased here for \$1.00 in the main file section. I hope you enjoy the series
