

Mp3 Cire - Adrenological

[DOWNLOAD HERE](#)

"With a sound comparable to acts like A Perfect Circle, Dredg, and Tool not to mention plenty of their own original style, Cire is destined to go places. This is a great album and highly recommended." -

DecoyMusic.com 12 MP3 Songs ROCK: Progressive Rock, ROCK: Psychedelic Details: Cire is guitar-driven, intelligent rock that has been described as combining the odd rhythms of Tool, the soulful improvisation of Gov't Mule, and the hi-fi production of Nine Inch Nails. The contemplative vocals of creator Eric Johanson often explore philosophical and scientific worldviews stemming from his interest in evolutionary psychology and politics. Cire has recently released its second CD, Adrenological. Eric cut his musical teeth playing guitar and recording his own original rock projects by the ripe old age of 12. At 13 he was assisting in a commercial recording studio, learning the production and mixing techniques that would ultimately lead to the evolution of Cire's brand of progressive psychedelic rock. Johanson seamlessly blends technology with the soulful musicianship that he honed while playing blues and rock guitar for years in clubs and festivals throughout the Southeast. After a year long stint on famed Beale Street in Memphis (1999), where Eric performed with blues legends such as James Cotton, and comedian/actor Eddie Griffin, Eric was named #3 out of the Top 10 Memphis blues attractions by the Kansas City Blues News. Feeling the ever-present itch for experimentation, Eric left his blues projects and started writing lyrics and music for his own entity, Cire. Johanson moved back to New Orleans where he built his own studio to record, produce, engineer, and play the lion's share of the instrumentation on Cire's debut CD, Pleasure Is Our Enemy. After the release of Pleasure Is Our Enemy, Eric joined forces with Doug Gay, a seasoned jazz/funk/rock drummer from Baton Rouge, LA. Cire's sound immediately appealed to Doug, who went on to lay down the incredibly conceptual drum tracks on Cire's 2nd CD, Adrenological. Adrenological is a brain-tingling experience that far surpasses Cire's first release in both beauty and intensity. Intricate rhythms, contemplative melodies, and psychological explorations form the basis of Adrenological. Visit Cire.tv for more info.
