Solo harmonica vocals. Back porch blues with a 21st century twist. All vocals and harmonica work by Mad Dog, a Colorado harmonica legend. 14 MP3 Songs BLUES: Acoustic Blues, BLUES: Chicago Style
Details: I am really pleased with how this project came out. Songs range from ones that will make you cry to ones that will make you laugh. I pulled off some shit on harp I am not sure I could do again some tricks on the production end that are best described as beautiful accidents. "Landing" is unique cut in that it uses harmonicas with electronic manipulation to produce a trance-like state in the listener while "White Lightning" is a pure acoustic back porch harmonica blues holler with an open your heart message. The last track, "Harmonica Cadillac," is my favorite, at least to perform, and features the harmonica imitating the rhythm of an old Cadillac sputtering down the highway.-- Mad Dog PS--Complete full quality free listening files for all tracks are available at maddogharp.com.
