Fantom Drum Kits

[DOWNLOAD HERE](#)

The Fantom-X Series are the world's first "Giga-Workstation" keyboards, giving musicians nearly 1GB of wave memory when fully expanded and powerful 128-voice polyphony. The synthesis section's new waves include a gorgeous 88-key split stereo-sampled piano, plus room for 4 SRX expansions. The sampler can be upgraded to 544MB of RAM, which provides enough recording time to use it like a digital recorder. The Fantom-X Series is also the first line of workstation keyboards with a color LCD screen. Between these features and their sleek new looks, the Fantom-X Series is poised to become the workstation of choice. Hit producers such as Danja,Mannie Fresh,Polow Da Don, JR Rotem & Timbaland use these very same sounds exclusively available from the Fantom modules. This package includes 23 kits which contain a total of 1,736 samples straight from the Fantom X These sounds were recorded and designed by professional engineers using Pro Tools for the best sample quality available. These samples have been processed with Waves processing tools and SSL compressors for more impact and presence in your musical creations. Many drum libraries tend to have overused fx, have digital distortion and lack clarity as well as the natural sounds that some of our favorite producers have come to rely on to make hit after hit. Our samples are are carefully picked, recorded, and fully analyzed to ensure that they are clear of any faults and have more live sounding feel which is credited to the drum sets, sound modules, and samplers which are widely used by award winning producers. You will notice the difference once you apply these sounds to your musical works and you will not regret it. For audio samples of loops made with these drums visit beat-makerz.com HARDWARE & SOFTWARE COMPATABILITY ANY INSTRUMENT OR PROGRAM THAT READS WAV FILES. All samples are in 16bit WAV file format & are royalty free.Please read included 'readme' file for additional licensing information.
