E.L.Pace blends New Age, Native American and Classical symphonic melodies to enhance moods and overall well being, in a truly unique style all her own. 13 MP3 Songs WORLD: Native American, NEW AGE: New Age Details: This instrumental CD offers a touch of classical, to a Native American and World flair. Very diverse, each track has its own style, giving you a great combination of sounds; melodic, imaginative, and creatively done, with great tempos. Focused on the film lovers out there, many tracks lend themselves to just that, provoking thought and feeling, which is what life should be about. Recorded in Virginia Horse Country, this CD is especially great for the horse lover, that wants music to train to. The first cut was written for the Lippizans, is ten minutes in length, and was to tell the story of Melora, a Lippizan Filly, that went on to become a Champion Dressage Horse, after being left for dead in a field, cut from front to back after running through a fence. She was nursed back to health, hoisted onto a sling for months, and never expected to regain her ability to walk correctly. After years of rehabilitation, not only did she prove everyone wrong, she became a top point earner, then a champion! Willfull wouldn't you say?!
