[DOWNLOAD HERE](#)

A personal collection of songs. Just plain vocal and guitar. The name uncooked came from the fact that it was recorded live as it happened in the studio, nothing added nothing taken away. 8 MP3 Songs FOLK: Progressive Folk, FOLK: Alternative Folk Details: This is the follow up album to Mistaken. Very different and a lot more personal. Another step in the journey along the my musical life. I don't many reviews about it as it is only just out, but below are some of the comments that I have had so far. His sound reminds me of all sorts of artists, John Martyn and Nick Drake amongst them, and yet it is quite distinctive and uncommonly expressive. Some great phrasing here. Peter Clitheroe Warm Neil Young There's a definite Neil Young feel to this song [no one like you] in the beginning, in the strumming style and in the chords themselves. The vocals are warm and smooth and very enjoyable. "Now that I feel stronger, I don't feel the same, I don't feel the same." The lyrics are well thought out, not just something thrown together last minute. Nice job! This was really nice The lyrics in this song [no one like you] are very good, and the song has a good build up and a great vibe. This is defo one of the best song that i have heard on garage band. I shall post more reviews as they come in. xnx People who are interested in James Taylor Rickie Lee Jones John Martyn should consider this download.
