

Inspiration Sounds - Dnb Breaks - 725mb Drum & Bass Drum Construction Kits(acid/wav/apple Loops/rex2/midi)

[DOWNLOAD HERE](#)

The ultimate drum and bass and jungle drums production package has arrived! DNB Breaks allows you to create an infinite number of DNB drum variations for your DNB tracks. Includes MIDI Files and Audio Files in ACIDized WAV, Apple Loops & REX2 formats for compatibility with audio sequencers and samplers. One of the most sensational features of DNB Breaks is that for every audio drumloop, there is a corresponding MIDI file, so you can put these phat grooves through your own gear to customize the feel of the groove. You can also mix different elements from different loops allowing you to create some dynamite DNB riffs! With over 391 "live-played" MIDI riffs to choose from, you will never need to buy another DNB drumloop again! The majority of the MIDI files follow GM drum settings, which is ideal for BFD, EZDrummer as well as external sound modules, drum machines and software drum machines. Top session drummer 'Callum Hodgkins' spent over six months performing and editing DNB Breaks to ensure that you can incorporate highly-complex and exciting drum grooves into your tracks, with very little effort. DNB Breaks is an essential buy for all serious drum and bass producers.
