Sexy vocals, rich harmonies, and hypnotic arrangements. 11 MP3 Songs ROCK: Modern Rock, POP: Quirky Details: HYPERPLUSH is a 4 piece, Southern California band, described as "Slo-mo Fusion." The sexy vocals, rich harmonies, and hypnotic arrangements are sure to put the fuzz in your velvet breeches. "HYPERPLUSH", the self-titled debut, blurs the distinction between acoustic and electric. With heady lyrics and addictive melodies, this "Smart Pop" album is sheer audio art. CD BABY NOTE: The CD is fuzzy! One of those CDs you just HAVE to show your friends. Very cool. "They've crafted a sound that's variously spooky, funny, spacey and pure pop. As they put it, slo-mo fusion/smart pop. More than anything else, this disc is a timely reminder of just how good some of the bands playing clubs in small markets all across America can be. Well, not many of them can be this good, I suppose, because this is real good. It's one of those "the more you hear it, the more you want to" kind of albums, and I've been hearing it a lot lately. And, oh, yeah, the arrangements are inventive, the players are tight and the women are beautiful. So what are you waiting for? Sink into the deep soft sound of Hyperplush." - Shaun Dale, Cosmik Debris "All in all the combinations makes for a very interesting sound and definitely an entertaining night of music" -Chris Jay, The Reporter "An exceptionally solid and entertaining debut show" - The Ventura County Reporter "A flurry of art and music" - Lisa McKinnon, Ventura County Star
