Details: Remember those awesome "bonus beats" on those 12" singles from the early 80's? Well--Reeno...the bonafide King of Soulful electrofunk, NYC..has put together an entire cd of raw 808 drum grooves! These beats were all produced on a REAL Roland TR-808 drum machine. No samples were used...this is the real deal, and it shows. These beats are ideal for dj's to mix into other records during one of their electro mixed-sets and great for producers to use in their productions...(they are not royalty-free, however. In the event you'd like to sample a portion of these recordings, you must first contact Spazzoid Records for sample clearances)
