

Carillion Soundfont2

[DOWNLOAD HERE](#)

Carillon SoundFont2. A huge carillon with 54 clocks, equal tempered, starting at Bflat, that spans 4 full octaves. All bells of the Carillon have been sampled on a quiet day: almost no traffic noise disturbs the sound. The library comes as a SoundFont2 and works with all soundfont2 compatible samplers. (Giga, Kontakt, Halion, EXS24, Reason, Vsampler etc etc).
