Bosendorfer 290 for GigaStudio 2 The best selling GigaPiano ever! This rar file expands to the full 2 GB Grandioso Bosendorfer 290 piano for GigaStudio 2 and compatible samplers. This Bsendorfer library provides the greatest possible control during the softest pianissimo, through crescendos to the reserves of power needed for the loudest fortissimo. By utilizing new technology to optimise the mechanical performance of the action, Post Musical Instruments has created a product which leaves the pianist in total control of dynamic response, timbre and touch. PMI has finally captured a grand piano with "breath". They recorded both dry samples and ambient samples. The dry samples are recorded fairly close to the piano strings. The wet samples are recorded at a distance so that the hall acoustic is captured. You can experience a concert hall type of sound and control the amount of ambience until you play it absolutely dry. Over 2 GB of samples, up to 16 recorded layers of velocity, separate sustain pedal up and down samples, multiple release samples... separate "dry" and "wet" samples that can be mixed for ultimate ambience control. The GigaStudio 3 version is now available and shipping! 24 bit samples, real-time sustain pedal, increased dynamics, smoother velocity response and GigaPulse body resonance make this library your ultimate sampled piano! The GS3 version comes on 1 DVD with 2 free Limited Edition versions (6 layers of velocity) of the two Gold Bundle Pianos (EMPEROR and OLD LADY). As a time limited introduction offer you pay \$140 only. PLEASE NOTE: You will need at least 1 GB of free RAM when playing the GRANDIOSO libraries from a RAM-based soft-sampler platform. When operating the samples on a disk streaming sampler (Giga, Kontakt with DFD, EXS24 with Virtual memory on and HALION) you need 512 MB.
