Ron in a death metal band and Antony in a funk band. Both bands had moderate success in the college and club scene. As time ticked on band members lost interest, or got real jobs. It seemed that the most talented seemed to keep moving forward. By the time Ron and Antony got together to start JUICE, Antony had already won 2 Q107 homegrown music contests, had been

awarded government money to record 3 times and was the runner up for the Scott Liddle music award. So born is JUICE. The best musicians were pooled together and in no time FACTOR had awarded the band enough money to record a whole record (thats another story). Upon completion of the record it was submitted yet to another music contest, this one called Kick Start Your Career. JUICE of course won that and the next thing you know they are opening for Motley Crue to a sold out crowd at Massey Hall. This lead to another contest called the Musicians Choice Award, put on by Beyond Records and Motley Crue. JUICE was the over all winner for Canada and then had a single released on a Motley Crue compilation. It was right after this that BMG Music Publishing took serious notice of the band and signed them to a world wide publishing deal. JUICE was chosen as one of Canadas most promising new acts and was flown to New Music West in Vancouver and then played Canadas Music Week. Canadas Music Week rated the band a 100 PERFORMANCE, a rating never given out before and never given since. The band was then submitted to the 97.7 HTZ FM New Rock Search contest again they were one of the top 3 winners. They wrote and recorded the songs in memory of Greg Moore, Canadas finest race car driver and their tracks from that are now in a TSN video depicted all of Greg Moores wins. With FACTOR behind them, BMG Music Publishing and the hit machine The Metal Works the band seems destined to write a smash album. With the new retrospective CD released, lets see what 2006 has in store for JUICE.
