"SIMMONS CLAP TRAP ORIGINAL SAMPLES COLLECTION" 24 BIT SAMPLES Soundset exclusively sampled from the legendary Simmons Clap Trap Vintage Analog Drum Synth from 1982 If you re lookin for interesting synth clap sounds and noise hits, look no further "The Simmons Clap Trap is a digital 8-bit EPROM-based (hand clap sample) with an analog noise and modulation sections used for generating synthesized clap sounds. The Clap Trap can be triggered a number of ways using it s external inch trigger inputs or manually via buttons on the top of the unit. There is also an Automatic repeat trigger mode that triggers the Clap Trap synth with a user selectable retriggering rate. The "Auto" mode is extremely useful when designing a synthesized clap sound with the front panel controls. Another unique feature on the Clap Trap is a Humanizer button that adds subtle variations to the clap sample speed and duration giving the clap synth a more human feel when triggered." Content of library: 270 Vintage Claps Samples (wav format 24bit 96 & 16bit 44.1) perfectly edited by our team & ready to make your beats vintage They have been carefully sampled via a Avalon U5 Class A DI Preamp to preserve the character of this legendary drum machine We hope you enjoy rediscovering the real sound of this unit and making it a part of your music Downloadable Product instantly available via downloadSearches:mpc simmons clap trap sounds
