Understand what the web essentially is and how you can capitalize on it. Find out what people are doing to make a living online and how to pick a business model that's right for you. We'll even go over some terminology and jargon that you might have already come across but didn't fully understand what they meant. Video 3 - Product research Most beginners fail to create profitable products simply because they've created something that they like the idea of. Whilst you may make money, it's simply a shotgun approach to marketing. Do your research first to understand what WILL sell, not what MIGHT sell. This video goes into depth about product research, the niche to go into, developing your niche and so much more. If you want to tread the right track and save a lot of mistakes in the process, you'll want to watch this video carefully. Video 4 - The Basic Tools You'll Need The mistake that beginners make is thinking that just because it's on the internet that it's 'easy' to make money. Again, careful planning is key to your success. Don't just start a blog on a random topic and start producing articles on a range of subject. The secret is in the affiliate program you promote, along with the keyword research, which will ultimately determine what you will be writing on your blog, as well as how long it will take before you can expect to get traffic and sales. This is not to be missed. Video 7 - Get Some Traffic! We're now well underway in getting your online business off to a great start.
