A soundtrack for the movie of your mind. 21 MP3 Songs ELECTRONIC: IDM, ELECTRONIC: Electronica  
Details: Dear reader, Last year my friend and director Todd Verow asked me to write a film score to run 84 minutes concurrent with and experimental film made from 10 second clips of mobile phone video. The result was the single most exhaustive and emotional body of music I have ever had to write and I am truly proud of it and the film that represents it. You will find themes that range from deep bass electronic and afro-jazz, to experimental and break beat. The instrumentation included my father John Owens, flutist Frank Wharton, Violist Nathan Felde, drummer Mike Feld (no relation) and a full-on sampled chorus of my voice and of course, lots of Fender Rhodes. If you liked Spaghetti Western and The Daydream you will love this album. At 21 songs it's a bargain to buy the CD versus downloading and it will play continuously from end-to-end in full fidelity.
