

# Fleury Dexterity Manual For Cello Vol 1

[DOWNLOAD HERE](#)

The most complete left hand dexterity builder ever composed for cello. After studying Cossmann, Starker, Dotzaur, and many other method books, it never ceased to amaze me that the mathematical combinations had never been encompassed into a single book. There are plenty of finger exercises out there, but not quite like this. 1,664 Exercises for manual dexterity are in this volume and includes all positions up to the 8th half-step (commonly called high 4th position) for both CLOSED and EXTENDED positions. Every combination of fingers has been included with a forward to instruct the teacher/student exactly how this should be played. Volume 1, released early 2008 is being used now all over the world, primarily in music educational settings. 51pps. High quality .pdf file. My students either hate it or love it. Copyright 2008 Paul Fleury.
