The bands line-up includes James Boned Mitch, Mr. Bitch (formerly known as Mrs. Mitch long story), and Serious Mitch. In 2003, Mitch Mitch put out their legendary first album entitled 'Luv Yer Country', and in 2006 they published '12 Catchy Tunes (We Wish We Had Composed)', an eclectic record which features music composed by some of the long-forgotten or ignored giants who had a considerable influence on Mitch Mitchs own artistic path. Mitch Mitch have caused havoc with their extraordinary show in countless cities across Poland (among them the historic suicide gig at the Country Picnic festival in Mragowo in 2005) and Western Europe (the I.D.E.A.L festival in Nantes, France, or the supermarket tour of Portugal to name just two occassions). The future seems bright for Mitch Mitch. No matter what, they intend to continue their Neverending Tour by demolishing clubs and stadiums alike, leaving no soul unaffected. There is no venue too small, no city too clean and no country too distant. Even Denmark. So watch out and beware. They WILL get you. Peace!
